

# Shout Out to Watershed Heroes!

## Dennis Morrison

---

Dennis Morrison, Vice-Chair, Whitestone Conservation Association

Hagerman Ratepayers' Association is operating as Whitestone Conservation Association.

Whitestone Conservation Association (WCA) is an independent Organization working for the residents of the Municipality of Whitestone on environmental issues. They work closely with municipal staff and council, but we are not a part of the municipal organization.

WCA represents cottage association members and area residents to help in any way that they can with lake management and environmental concerns.

Dennis has for many years, spearheaded the water quality testing program. Fish management and water quality issues are being addressed on an annual basis. Dennis has brought a huge amount of knowledge and keeps coming up with new ideas and ways of learning more about our water regionally. He personally goes to each lake that is tested, about ten in all, and spends a couple of hours testing and analyzing the results as well as tracking the progress of each. It takes much of his summer to get this all done. He is also the representative on the Whitestone Environmental Stewardship for the municipality. He shares his knowledge and will fight for the maintenance of the standards we all believe will preserve our waterways and our enjoyment of such. His attention to detail is magnificent and he can clearly explain the issues around the waters.

As part of our 50<sup>th</sup> anniversary we're proud to recognize you Dennis as a Watershed Hero!
